Chapter 4.2 Capacity balance at system level

The numerical values shown in the caption of Figure 15 are correct.

However, the text below Figure 15 currently states:

“...has increased from the 14.9 GW forecast in the 2024 review of the security of supply to 34.2 GW in the current review”.

This should be replaced with:

“...has increased from the 14.9 GW forecast in the 2024 review of the security of supply to 37.1 GW in the current review”.
