

## Changes as of 08-01-2025:

### Main text TSC: no further changes

#### Appendix 1:

For the network points connected to storages connected to the TTF and THE, it was noted in the remarks section, that appendix 11 applies to the tariffs noted in this appendix.

#### Appendix 11: Agreement on applicable tariffs to and from storage facilities that are physically connected to the Dutch and German market area

Minor changes have been made to articles 3.2 and 3.3 plus 3.5 and 3.6 of *the Agreement on Applicable Tariffs to and from Storage Facilities that are Physically Connected to the Dutch and German Market Area*. In these articles cross border flow is described from TTF to THE, and from THE to TTF respectively. Adjustment was needed in order to sufficiently provide clarity in which situations there is cross border flow.

Specification added that contracts with listed SSOs have been concluded (whereas in the earlier version it was stated contracts were expected to be concluded by 1-1-2025).

Network point description for network point 301391 was updated.

## Additional changes after consultation (in effect as of 01-01-2025):

#### Appendix 1:

The following network points have a name change:

- 300099 was OSS (BALL PACKAGING EUROPE BV)

forgot to remove from the list

Following stations have been ended:

- V173 ZWOLLE GROEN GAS (ROVA)

#### Appendix 2a and Appendix 2b: Quality and pressure entry and exit points:

Network point Tegelen remains included in appendix 2b. It is noted in footnote 3 that the Network point will no longer be in operation as of 01-03-2025.

## Consulted changes (in effect as of 01-01-2025):

### Main text TSC:

The following changes will be applied in the main text:

- Addition 5.1.4: Calculation of the amounts chargeable for storage facilities connected to more than one market area (Storage as IP)
- In article 1.3 in the definition of "conformation" the formatting of the word "hour" is changed to fit the formatting conventions in the document.
- In article 5.12.1 a missing white space is added.
- Artikel 6.A.12 is intentionally deleted because there are no longer any contracts this article applies to.
- All references to Regulation (EC) No 715/2009 will be replaced by Regulation (EU) 2024/1789 because this regulation repeals the earlier regulation. In the same way Directive 2009/73/EC was replaced by Directive (EU) 2024/1788.

#### **Appendix 3: Diversion**

The reference to the VIP transfer service is deleted because this service is obsolete as of 5 February 2025, due to new legislation.

#### **Appendix 4: Wheeling**

No changes.

#### **Appendix 5: Operating procedures**

In appendix 5 the following points have been changed:

- In article 1.5 the types of technical messages that must be used are updated.
- In article 1.7 the notion that a party remains responsible for its nomination in case of IT issues and is expected to check the results in its confirmation is added. Reason for this addition is that, in case of IT issues, there is not a transfer of responsibility for nominations. Possible incorrect input can only be prevented if parties check the results in their confirmation.
- In article 2.2, the text regarding feedback on receiving a transport (re)nomination has been added for the sake of completeness.
- In article 2.4 the timing of the handling of a (re)nomination on a short lead time network point has been reshuffled from article 3.2 to 2.4 for readability.  
Also, in article 2.4 some words are added for the sake of completeness and to bring the text more in line with (unchanged) practices.
- In article 3.1 the text regarding feedback on receiving a TTF and/or TTFB (re)nomination has been added for the sake of completeness.
- In article 4.1, a reference to article 4.8 has been added for the sake of clarification.
- In article 4.7 consistency is made in wording

In article 4.8, the list of network points on which the Producer Preval matching rule is used, has been updated.

In article 5.7 consistency is made in wording.

#### **Appendix 6: Allocation**

In article 3 the following entry- and exit points included in the list of entry- and exit points where a neighbouring network operator or other third party performs allocation:

301072 BALGZAND (NAM -LC)  
301101 VRIES (NAM)  
301107 TEN ARLO (NAM)  
301084 GARIJP (VERMILION)  
301089 KOOTSTERTILLE (VERMILION)  
301108 WAALWIJK (VERMILION)
