Groet Rudi

BBL Company (BBLC) generally agrees with the GTS statements about "Interactions with the gas market area in Great Britain" as mentioned on slide 9. However, BBLC would like to emphasize the pivotal role of the pipeline during the energy crisis and its continued crucial role in facilitating security of supply and well-functioning of European gas markets for the benefit of the community..

Since the start of the energy market disruptions caused by Russia's invasion of Ukraine gas flows drastically shifted from "East to West" to "West to East". BBLC contributed substantially in delivering gas volumes to the Netherlands and continental Europe. Since 2022 until July 2024 BBLC delivered up to 71 TWh to NL compared to 1,5 TWh to GB. This confirms the role BBLC has with regards to security of supply in NL and facilitating West-East gas flows.
