Subject

Capacity release

Dear Sir, Madam,

In our continuous efforts to optimize the amount of available capacity in potentially congested areas, GTS regularly evaluates and if possible and appropriate, adapts the principles used in the capacity planning process.

This has resulted in an increase of available capacity in the network, where gas from entry points Rotterdam Gate (301345), Maasvlakte Q16 ONE (301454) and Maasvlakte TAQA (301090) enters our grid.

The additional capacity can be booked for any of these entry points but the booked capacity cannot exceed the available capacity as is stated in Enclosure 1. Available capacity overview to this letter.

Procedure

The available capacity can be requested with start date 1 September 2017 or later. It can be booked on a monthly, quarterly or yearly capacity basis.

Booking request forms for the capacity release have to be sent to the Customer Desk (customerdesk@gastransport.nl) **before** 5 August 2017.

Shippers will receive a confirmation upon receipt of the booking request form.

If the total requested capacity does not exceed the available capacity, all booking requests will be booked and confirmed.

Notary procedure

If the total of requested capacity by shippers exceeds the available capacity, a notary procedure will be used, meaning that all booking requests will be collected and a notary will draw the booking requests up to the total available capacity. These capacities will then be booked by GTS.

In case drawn requests cannot be fully awarded, only the capacity that is available will be booked.

If that is not your intention please indicate the minimum requested capacity on the request form.

If applicable, the notary procedure will take place on 9 August 2017, all concerned shippers will be informed about the outcome and whether or not their booking request was drawn and processed.
